STUTTERING QUESTIONNAIRE

1. How long has your child been disfluent?	
2. Is there a history of chronic stuttering in the family?	
3. Is the severity (frequency, duration, consistency) of the disfluencies increasing?	
4. Have your child's disfluencies persisted since being observed (as opposed to being episodic with long periods of normal fluency)?	
5. Does your child perceive himself to be disfluent?	
6. Does your child experience communicative fear because of the disfluencies?	
7. Does the child avoid speaking situations?	
8. Does your child express anger or frustration because of the disfluencies?	
9. Is there observable tension or stress noted during the disfluency?	
10. Is there loss of eye contact during the moment of disfluency?
